

INTERVENTIONAL ONCOLOGY SEMINAR

SATURDAY 13TH
MAY 2017

•
SEMELI HOTEL,
NICOSIA

OBJECTIVE

Interventional Oncology (IO) is a clinically based subspecialty of Interventional Radiology that can provide a vast range of minimally-invasive image-guided procedures to diagnose and treat cancer in many organ systems. IO is continually exploring new territories and techniques so keeping up-to-date can be a challenge.

The main aim of this half-day seminar is to offer all oncology practitioners a forum for education and exchange on IO services and let all colleagues collaborating against cancer (pathologist, oncologist, gastroenterologist, hepatologist, surgeon, radiation oncologist, oncology nurses etc.) as well as specialists from other disciplines to learn about the potential benefits of image-guided oncological therapies first hand.

**Organized by the
Interventional Radiology
Section of the Cyprus
Radiological Society**

Please let us know if you will be attending the seminar by emailing:

INTERVENTIONAL ONCOLOGY SEMINAR

SATURDAY 13TH
MAY 2017

•
SEMELI HOTEL,
NICOSIA

PROGRAMME

0830-0900	Registration / Coffee
0900-0905	Welcome address
0905-0930	DIAGNOSIS Image-guided biopsy: What can be biopsied; modalities and equipment choice
0930-1045 0930-1000	SUPPORTIVE PROCEDURES Vascular Access – Central Venous Catheters: choice of central venous catheter and advantages and disadvantages of each type (PICC Line, Hickman line, Port-A-Cath) <ul style="list-style-type: none">- Interventional radiologist's perspective- Oncologist's perspective
1000-1015	Image-guided drainage incl. PleurX system
1015-1030	Radiological inserted gastrostomy
1030-1045	Nephrostomy and ureteric stent insertion
1045-1115	Coffee Break
1115-1200	SUPPORTIVE PROCEDURES continued
1115-1130	Biliary drainage and stent
1130-1145	IVC filter insertion
1145-1200	Pain control techniques
1200-1330	TREATMENTS
1200-1220	Radio-embolization – <i>Guest speaker</i>
1220-1250	Thermal ablation – which modality when? <i>Radiofrequency</i> <i>Microwave Ablation</i> <i>Cryoablation</i>
1250-1305	Newer techniques – Irreversible Electroporation (NanoKnife) and its use in open surgery
1305-1320	Embolization – TACE Vs Bland
1320-1330	Close / Discussion
1330	Lunch kindly provided by our sponsors

Speakers

Dr. Kyriacos Patatas
Dr. Maria Tsitskari
Dr. Chrysa Tziakouri
Dr. Nektarios Poullos
Dr. George Astras
Dr. Athanasios Petrou
Dr. Periklis Zavridis
Guest Speaker Dr. Dimitrios Filippiadis Assistant Professor of Diagnostic and Interventional Radiology

Free registration

4 CME points will be accredited to participants
